Hanoi

CAREER OBJECTIVE

As a highly motivated **AI Engineer & Backend Developer**, my objective is to leverage my solid foundation in software engineering, system integration, and LLM applications to build scalable, high-performance **Agentic AI systems**. Experienced in integrating AI-driven features and optimizing backend architectures. I am eager to contribute to Viettel's cutting-edge AI initiatives, focusing on Agent orchestration, workflow automation, and production-ready deployments.

EDUCATION

FPT University 9/2022 - 9/2026)

Software Engineering

Currently completing my graduation thesis. Actively involved and playing a core role in practical capstone projects (SWP391, PRM393, PMG201c). Notably, one of my team's projects was ranked in the top 30% of outstanding university projects and was awarded a research and development grant of 50,000,000 VND.

WORK EXPERIENCE / KEY PROJECTS

Fsoft (FPT Software) 5/2025 - 8/2025

Intern .NET

Acquired fundamental skills and deep knowledge related to the .NET framework.
Familiarized with the enterprise software development lifecycle and professional coding standards

FPT University 9/2025 - 4/2026

SkillMatch - AI-Integrated Recruitment Platform

Fullstack Developer & UI Designer
Tech Stack: React, Node.js, MongoDB.
Developed a full-stack recruitment platform featuring **AI-driven candidate skill assessment** and anti-cheating monitoring.
Designed and optimized **Prompt/Context Engineering** and implemented **Function Calling** (or Structured Output) with LLMs to parse resumes and generate standardized skill scoring.
Built secure backend APIs using **Node.js/Express**, managed persistent application states, and integrated PayOS payment gateway.
Optimized frontend performance (removed heavy rendering bottlenecks) to ensure a seamless UI/UX experience for multi-user production.
